NIKOMAX modular patch panel 19", 1U, 48 ports for Keystone, UTP/STP, with grounding wire and cable organizer

- ✓ Flexible modular solution
- ✓ Shielded performance
- ✓ High port density

Modular patch panels are designed for connecting different SCS subsystems and network equipment to each other with patch cords.

NIKOMAX NMC-RP48-BLANK-1U-MT has a standard height of 1U and 48 ports for Keystone jacks. The modular design is extremely easy to install and allows the flexibility to combine different types of connectors and categories on a single frame. If required, the jack can easily be removed and rearranged to another port or panel. All ports of panel are numbered and have additional labeling area.

The patch panel is made of 1.5 mm steel and is suitable for both shielded and unshielded jacks. For better shielding against electromagnetic interference and improve communication with unpainted rails cabinet, galvanized steel panels coated with nickel.

Patch panel offer convenient detachable organizers for routing incoming cables. For ease of administration, it is also recommended that for every 48 ports of patch panels an additional organizer be installed for laying patch cords.
