Personal VoIP Gateway

Planet VoIP Gateway SKG-300, offers the seamless integration of traditional and IP-based telephony meanwhile; allowing any standard home phone into a dual function PSTN and Skype handset. Instead of dealing with peripheral equipment, just pick up the standard home phone and press hot key, user can call anyone no matter the receiver is using PSTN or Skype.

The SKG-300 also provides Incoming Call Forwarding feature, that is, an easy configuration allows user to forward the incoming calls to the specific Skype account or PSTN call. Without many technical details, consumers can enjoy the SKG-300 unparalleled functionality such as three-way conference calling between PSTN and Skype callers and automatically switching between analog and digital sessions.

It has never been so easy to take advantage of VoIP benefits, and provide consumers the most straightforward mechanism for placing high-quality, and competitively-priced voice over IP calls. Just requiring a simple installation and configuration, Planet VoIP Gateway SKG-300 will be the ideal for both residential telephony and the mobile computing professional on the go.
